

NEW

OBP Apex Polymeric Joint Sand

Best quality joint fill for interlocking concrete pavers and slabs

- Minimal breakdown of sand under loading
- Angular shape increases strength of interlock
- Oven dry characteristics for easy sweeping with no clumps
- Gradation maximizes polymer bond with sand, reducing sand loss from the elements
- Can also use in conjunction with mortar as part of ORCO vehicular paver system
- Excellent weed mitigation

For sand set paver applications - Ideal for use in public walkways and pool decks

Available in Gray & Tan
